

SUNVISORS 4 ISUZU TRUCKS

aeroZ4TRUCKS

STYLE & SAFETY

Australian conditions make the installation of truck Sunvisors very popular. Most aftermarket options available are not only ugly, but dramatically interfere with the trucks aerodynamic styling and can be noisy.

Aeroz-Products has developed a "euro-style" fully moulded Sunvisor for the Isuzu N-Series and F-Series that not only does the job of protecting occupants from sun glare, but is also designed as 'flow through' enabling enhanced aerodynamics, assisting both stability and efficiency.

The Aeroz-Products Isuzu Sunvisors are made using an in-mould Isuzu white computer colour matched gelcoat. This means that unless the truck cab is being painted to corporate colours there is no need to paint the Sunvisor. If painting is required, the quality of the Aeroz-Products Sunvisor enables this process to be easily completed.

Each model Sunvisor is vehicle specific and all are supplied with four pre-wired marker lights. An Aeroz-Products moulded Isuzu Sunvisor enhances both the aesthetic appeal and safety aspect of your vehicle.

KEY FEATURES

- ▲ Made in Australia
- ▲ Strong bonded design
- ▲ No exposed brackets
- ▲ Easily installed - Easily cleaned
- ▲ Substantially reduces sun glare
- ▲ Assist maximising attention to driving
- ▲ Additional visual presence in darkness
- ▲ Easily removed (if necessary)
- ▲ Designed to channel airflow
- ▲ Won't cause cab damage
- ▲ Easily painted (if required)

Designed to work. Made to last.

SUNVISORS 4 ISUZU TRUCKS

aeroZ4TRUCKS

TECHNICAL INFORMATION

1. Aeroz-Products Sunvisors are a two piece construction, achieving strength by combining two individually moulded sections eliminating the need for exposed brackets.
2. Aeroz-Products Sunvisor rear moulding, as well as providing strength, incorporate Isuzu cab model specific mount points. These points create the gap for airflow.
3. Aeroz-Products moulded Isuzu Sunvisors include pre-wired clear marker lights that are wired into the factory roof light system. These lights are high quality LED units.
4. Aeroz-Products Isuzu Sunvisors compliment the roof mounted Fuelscoop, channelling airflow from windscreen to aero-device. (Please note: some photos show original amber lights)
5. There is an Aeroz-Products Isuzu Sunvisor suitable for N-Series and all F-Series cabs (narrow and wide). All are made to an OEM standard and compliment the high quality of the Isuzu cab. If you need a Sunvisor, no longer is your only choice an unattractive steel, or fibreglass wind-catching 'peak'!
